8:45 a.m.— 12:00 p.m.

Quality Inn & Suites  
800 N. Kinzie Ave.

## Key Information

**Who Should attend:** Homebuilders,  
Contractors, Developers

**Date:** Thursday, February 22nd, 2007

**Time:** 8:45 a.m. registration  
9:00 a.m.-12:00 p.m. sessions

**Place:** Quality Inn & Suites  
800 N. Kinzie Ave.  
Bradley, IL 60915

**Speakers:** Jonathan Koepke, Encap, Inc.  
Dan Salsinger, Ero-Tex

Proper erosion and sediment control practices have proven to reduce the amount of sediment and other non-point source pollutants in stormwater runoff from construction sites. Created for Homebuilders, Contractors and Developers, this seminar will make it easy to understand the local, state and federal rules and regulation that relate to soil erosion and sediment control for constructions sites as well as guidelines for BMP design, installation and maintenance. Sessions will cover regulatory requirements for SESC measures, guidelines for planning and installation of BMPs, site inspection guidelines and will include information on the newest technologies and practices to protect water quality in urban and developing areas.

## Workshop Agenda

8:45 a.m. Registration

9:00 Welcome and Introductions

9:15– 12:00  
Stormwater Regulation and  
Technical Standards

Sediment Control Practices and  
Products-*Dan Salsinger, Ero-Tex*

Erosion Control Practices,  
Site Inspections and Reporting Plans  
- Jonathan Koepke, Encap, Inc.
